## SUMMARY

Full-stack software engineer with 3 years of experience shipping production web and mobile products — 10+ live projects and 4 mobile apps built with React Native and Expo. I work mainly with Next.js and TypeScript across the full stack, and I pick up new technologies fast when a project needs them. I own projects end to end: pixel-accurate UI, API and database design, SEO, CI/CD, and deployment — comfortable working remotely with international clients and teams across Morocco and Europe. What drives me is turning ideas into products people actually use, and every project linked on this page is live in production. Portfolio: **tetharish.com**.

## EXPERIENCE

**Software Engineer**, Izemx — Remote Feb 2025 – Present

- Build and ship production features across the full stack with Next.js, TypeScript, and Node.js in a fully remote team.
- Own features end to end: UI implementation, API design, database modeling, and deployment.
- Review code and maintain CI/CD pipelines to keep releases fast and reliable.

**Freelance Full-Stack Developer**, Remote — clients in NL, MA & EU Dec 2023 – Present

- Delivered 10+ live client projects end to end: scoping, design implementation, development, SEO, and deployment.
- Built and published cross-platform mobile apps with React Native and Expo, including Play Store releases.
- Integrated headless CMSs (Strapi), REST APIs, JWT authentication, and payment/booking flows.
- Rescued and refactored existing codebases; fixed broken CI/CD pipelines and cut deployment friction.

**Mobile & Web Developer (Intern)**, Marketing Confort — Remote Jun 2024 – Sep 2024

- Built an AI homework-assistant product: React Native/Expo mobile app plus a Next.js admin back office.
- Developed a parent tracking app (real-time academic progress and notifications) and VSN, a vehicle tracking system with live GPS and fleet management.
- Developed Yalla Sport, a sports-event platform — Next.js frontend with a Spring Boot microservices backend, working in Scrum.

**Full-Stack Developer (Intern)**, YH Consulting — Tangier, MA Jun 2023 – Aug 2023

- Built a stock management application with Spring Boot, JavaScript, and Bootstrap; improved performance and frontend-backend connectivity.

## SELECTED PROJECTS — all live, more at tetharish.com/work

**WinkWing** — winkwing.com Next.js, Strapi

- Apartment-search platform that scans 750+ websites every minute; built the Next.js frontend on a Strapi headless CMS.

**Junto Go** — Google Play React Native, Expo, Express

- Local-deals marketplace mobile app connecting buyers with nearby sellers; built and published the cross-platform app and its Express backend.

**Melhorquenada** — melhorquenada.com Next.js, Express, JWT

- Full-stack car rental platform for the Moroccan market: vehicle search, online reservations, agency management, and advanced SEO for organic acquisition.

**GreenTeam** — greenteam.nl Next.js, Tailwind, CMS

- SEO-optimized, lead-generation website for a Dutch flooring and renovation company, focused on conversions and inquiry flow.

**Achieve** — achieve.nl Next.js, Tailwind, PostgreSQL

- Website for a Dutch digital agency; delivered as a freelance engagement from design to production deployment.

## TECHNICAL SKILLS

---

**Frontend:** React, Next.js (App Router), TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Material UI

**Mobile:** React Native, Expo (EAS builds, store publishing), cross-platform development

**Backend:** Node.js, Express, Spring Boot, REST APIs, JWT auth, Strapi (headless CMS)

**Databases:** PostgreSQL, MySQL, MongoDB

**DevOps & Cloud:** Docker, GitHub Actions, CI/CD, self-hosted runners, AWS (EC2, S3, Lambda), DigitalOcean, Vercel

**Practices:** Git (GitHub, GitLab), SEO optimization, Scrum/Agile, code review
